

Quarterly Fund Update: Salt Capital Growth Fund - 30 September 2026

This fund update was first made publicly available on 29 October 2026.

What is the purpose of this update?

This document tells you how the Salt Capital Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Salt Investment Funds Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

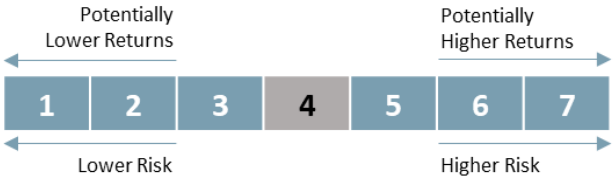

Description of this fund

The Fund's investment objective is to outperform the Reserve Bank of New Zealand's Consumer Price Index +5% p.a. benchmark on a rolling five year basis. The Fund targets a diversified mix of growth and defensive assets, with a focus on securities with strong ESG credentials.

Total value of the fund	$66,032,015
The date the fund started	15 September 2021
Number of investors in the fund	14

What are the risks of investing?

Risk indicator for the Salt Capital Growth Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on a mix of benchmark index returns data and actual fund returns for a five-year period to 30 September 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

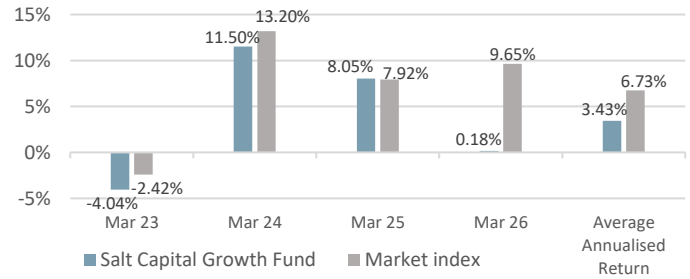

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past five years	Past year
Annual return (after deductions for charges and tax)	3.63%	1.06%
Annual return (after deductions for charges but before tax)	4.27%	1.75%
Market index annual return (reflects no deduction for charges and tax)	6.98%	7.95%

The market index return is the target investment mix asset allocation weighted sum of the asset class market index return, where the target investment mix and asset class market indices are each as described in the Statement of Investment Policy and Objectives (SIPO). For more information about the market index see the offer register at discloseregister.companiesoffice.govt.nz.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2026. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

Important: This does not tell you how the fund will perform in the future.

What fees are investors charged

Investors in the Salt Capital Growth Fund are charged fund charges. In the year to 31 March 2026, these were:

	% of net asset value
Total fund charges Which are made up of:	1.09%
Total management and administration charges Including:	1.09%
Manager's basic fee	0.91%
Other management and administration charges	0.18%
Total performance-based fees	0.00%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS on the offer register at disclose-register.companiesoffice.govt.nz for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term. Sam had $10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Sam received a return after fund charges were deducted of $175 (that is 1.75% of his initial $10,000). Sam did not pay any other charges. This gives Sam a total return after tax of $106 for the year.

What does this fund invest in?

This shows the types of assets that the fund invests in.

Actual investment mix

Target investment mix

Australasian equities	25%
International equities	45%
