

SALT

Quarterly Fund Update: Salt Sustainable Growth Fund - 31 December 2021

This fund update was first made publicly available on 14 February 2022.

What is the purpose of this update?

This document tells you how the Salt Sustainable Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Salt Investment Funds Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Fund's investment objective is to outperform the Reserve Bank of New Zealand's Consumer Price Index +5% p.a. benchmark on a rolling five year basis. The Fund targets a diversified mix of growth and defensive assets, with a focus on securities with strong ESG credentials.

Total value of the fund	\$57,885,444
The date the fund started	15 September 2021
Number of investors in the fund	3

What are the risks of investing?

Risk indicator for the Salt Sustainable Growth Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the benchmark index returns data for a five-year period to 31 December 2021. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

Annual return (after deductions for charges and tax)	Not applicable
Annual return (after deductions for charges but before tax)	Not applicable
Market index annual return (reflects no deduction for charges and tax)	Not applicable

The market index return is the target investment mix asset allocation weighted sum of the asset class market index return, where the target investment mix and asset class market indices are each as described in the Statement of Investment Policy and Objectives (SIPO). For more information about the market index see the offer register at www.business.govt.nz/disclose.

What fees are investors charged

Investors in the Salt Sustainable Growth Fund are charged fund charges. Estimates of these that will be paid by an investor in a year are:

	% of net asset value
Total fund charges Which are made up of:	1.05%
Total management and administration charges Including:	1.05%
Manager's basic fee	0.90%
Other management and administration charges	0.15%
Total performance-based fees	0.00%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS on the offer register at www.business.govt.nz/disclose for more information about those fees.
